003152

Dear Mr. Wright:

Pursuant to our telephone conference call on November 12th, please find enclosed a list and map which delineate the documented water wells within one mile of the site. Also included is a map which shows our suggested locations for the proposed deep groundwater monitoring well.

Our first preference is shown as #1, since it would be located next to an existing shallow well and very near Olds Press and Forge deep well. Both locations are located within the suspected creosote plume and are thought to be down gradient of the site.

If you have any questions, please let me know.

Sincerely,

A handwritten signature in cursive script, appearing to read "James R. Campbell".
